

I would like to let you know the important role that K-Love plays in my life. I listen to it every morning on my way to work. As I work quite a ways from home, I lose one signal and can easily change stations to get K-Love on another station that has become in range. It's such an encouragement to start my day with positive music and encouraging words from the DJs, as well as the brief segments that are played of positive role models in our society such as Dr. James and Shirley Dobson, Billy Graham, Luis Paulau, etc. The music and encouraging words remind me on a daily basis what I was created for. It puts me in the right mindset to be thankful to God, worship Him, and to love those who I will encounter that day. I'm sure there are many people who land on the station on a daily basis who don't even realize it's a Christian station, but they are reminded of what is important and life and they are told that they are loved and they have a life changing experience that results in a better, happier person...which in the end not only benefits them, but society as well. Please realize that there are many thousands of people throughout the world who have created a daily habit of listening to this station in order to praise and worship God and to be blessed. Also, many people have had their lives changed in a positive way...can any other station make that kind of claim?

Thank you for continuing to keep K-Love on all the signals it's currently on rather than displacing it by an LPFM broadcast service.
